

Simple
Safe
Scalable
Sustainable Returns

A Better Way...

- True multi-phase (100% liquids to 100% gas)
- High Δ pressure up to 1,500 psi
- Pneumatically driven
- Small footprint
- Easy rig up
- Liquid flow rates comparable to flaring
- Low noise level
- Economical – compares to other techniques
- Saves product

Let ZENRG Industrial Services be your choice to help achieve your ESG targets by providing a worry-free service, eliminating the need for making significant capital investments in equipment and building and dedicating a workforce, workspaces, and infrastructure to maintain and operate the equipment.

24/7
SERVICE

24 x 7
Availability

Experienced crews to meet your work needs 24 x 7 across the lower 48 US

Proven
Technology

Differentiated solutions using best fit technologies for specific applications

Safety
Controls

Safety controls are core to our operations from equipment to procedures

Highly
Specialized

Crews are trained to industry and customer specific requirements

ZENRG SERVICES

“KEEPING IT IN THE PIPE”

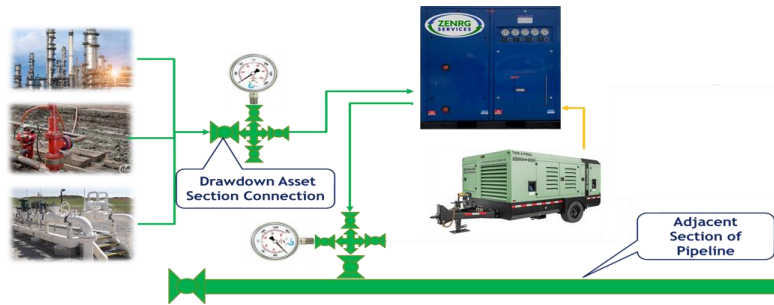

ZENRG Industrial Services is committed to helping its customers meet their emission reduction goals by eliminating venting and flaring of gas or liquid products in a variety of Midstream and Downstream applications. Our certified technicians execute the service using industry proven, intrinsically safe, patented technology.

ZENRG Industrial Services
1177 West Loop South, Suite 1717
Houston, TX 77027
Phone: 713-379-3674

SMALL FOOTPRINT, FAST SET-UP & INTRINSICALLY SAFE

BROAD APPLICATIONS

- Bullet Tanks
- Facility Piping
- Filter Vessels
- Fractionators
- Meter Stations
- Pig Traps
- Production Facilities
- Provers
- Stopped Sections
- Storage Caverns
- Towers

ZENRG Features	Reduces Risk	Lower Total Cost of Operations	Enhances Environmental Stewardship
Mitigate / Eliminate Venting & Flaring	👤	✅	👍
Eliminate location preparation for flaring	👤	✅	👍
Handles multi-phase fluids (100% gas to 100% liquids)	👤	✅	👍
Easy to Use, Quiet, Compact & Portable	👤	✅	👍
100% mechanical (pneumatically driven)	👤		
No onboard electronics (Class 1, Div 1)	👤		
Safety controls - equipment design & procedures	👤		
Retain value of product to sell vs. wasting		✅	👍
Outsourcing eliminates need for large capex investments		✅	
Outsourcing eliminates need for dedicated infrastructure		✅	
Outsourcing eliminates need to hire and train workforce		✅	
"Just-in-time" dispatch as required		✅	
Commercial flexibility - call-out vs contracts		✅	

CAPABLE OF TRANSFERRING GAS & LIQUIDS

NATURAL GAS

HEAVY PRODUCTS

Crude Oil

Gasoline

Fuel Oils

Other Refined Products

HVL's (Highly Volatile Liquids)

NGL's (Natural Gas Liquids)

Ethane

Propane

Butane

HRVOC's (Highly Reactive Volatile Organic Compounds)

Propylene

Butadiene

Ethylene

Eliminate the negative impacts associated with venting & flaring:

- 1- Reduce Risk
- 2- Lower total costs of operations
- 3- Enhance Environmental stewardship
