

Simple
Safe
Scalable
Sustainable Returns

A Better Way...

- True multi-phase capability
 - (100% liquids to 100% gas)
- High Δ pressure up to 1,500 psi
- Pneumatically or field gas driven units
- Small footprint
- Easy rig up / rig down
- Low noise level
- Economical
- Eliminate flares & gas buster open top containers
- Saves oil & gas production

Let ZENRG Industrial Services be your choice to help achieve your ESG targets by providing a worry-free service, eliminating the need for making significant capital investments in equipment and hiring and dedicating a workforce, acquiring workspaces, and infrastructure to maintain and operate the equipment.

24/7 Availability

Experienced crews are available to operate 24/7 to meet your work schedule.

Proven Technology

Differentiated, unique patented technologies and processes.

Safety Controls

Pneumatic device is Class1/Div1 rated. Field gas driven unit has remote monitoring capabilities.

Highly Specialized

Our crews are trained and highly specialized to work with high pressure lines.

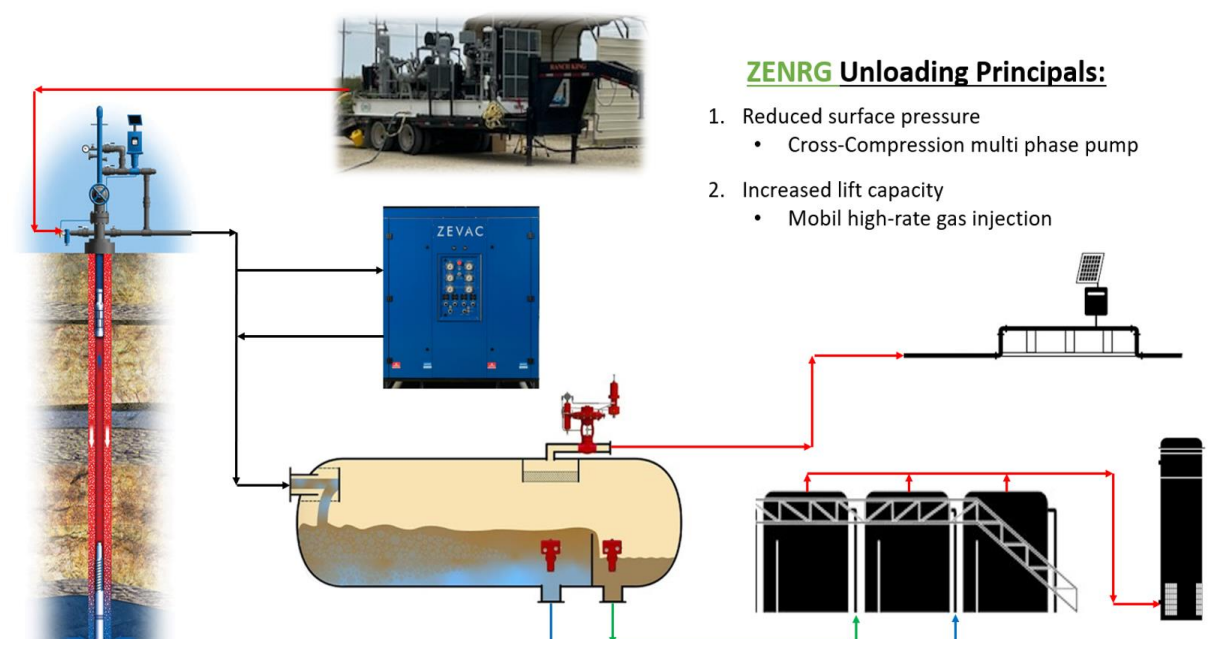

ZENRG Industrial Services

“KEEPING IT IN THE PIPE”

ZENRG Industrial Services is committed to helping its customers meet their emission reduction goals by eliminating venting and flaring of gas or liquid products in a variety of Upstream Oil & Gas applications. Our certified technicians execute the services using industry proven, patented technology.

- ZENRG Unloading Principals:**
1. Reduced surface pressure
 - Cross-Compression multi phase pump
 2. Increased lift capacity
 - Mobil high-rate gas injection

BROAD APPLICATIONS

- PRODUCTION - LIQUID UNLOADING WELLS
- INTERVENTION - BLOWING DOWN & KILLING WELLS
- COMPLETIONS – FRAC PLUG DRILL-OUTS
- CHEMICAL INJECTION
- HOT OILER GAS CAPTURE
- PRESSURE TESTING
- REPAIR & MAINTENANCE

Example of how ZENRG technology works

ZENRG Features	Reduces Risk	Lower Total Cost of Operations	Enhances Environmental Stewardship
Mitigates/Eliminates Venting & Flaring	👤	✅	👍
Eliminate location preparation for Flaring	👤		
Eliminate open top container & gas buster	👤	✅	👍
Option for No Onboard Electronics (Class 1, Div. 1)	👤	✅	👍
Easy to Use, Quiet, Compact & Portable		✅	👍
Captures product to sell		✅	
Handles multi-phase and 100% gas or 100% liquids		✅	
Outsourcing eliminates need for large capex investments		✅	
Outsourcing eliminates need for dedicated infrastructure		✅	
Outsourcing eliminates need to hire and train workforce		✅	
"Just-in-time" dispatch as required		✅	
Commercial flexibility - call-out vs contracts		✅	

Capable of transferring Gas & Liquids

Eliminate the negative impacts associated with venting & flaring:

- 1- Reduces risk
- 2- Lower total costs of operations
- 3- Enhance environmental stewardship

Benefits of using ZENRG Industrial Services
