

## **ZENRG Services, Inc. and T.D. Williamson Form Strategic Alliance to Deliver Cross-Compression Services**

FOR IMMEDIATE RELEASE

May 6, 2024

**HOUSTON, TX** — ZENRG Services, Inc. ("ZENRG"), the nation's leading provider of recompression services for the energy sector and T.D. Williamson ("TDW"), a global leader in pipeline technology and services, announce a Strategic Alliance Agreement. This partnership combines the specialized expertise of both companies to deliver comprehensive cross-compression services.

The alliance integrates ZENRG's industry-leading cross-compression capabilities with TDW's extensive pipeline service offerings, including hot tapping and isolation, pigging, in-line inspection and repair. Both organizations share an unwavering commitment to safety and operational excellence, enabling customers to achieve project objectives while maintaining product in the pipeline—enhancing both safety and environmental performance.

"Since our founding at the end of 2021, ZENRG has experienced remarkable growth by cultivating a 'safety and customer first' culture that resonates with both our clients and dedicated employees," said Joe Chandler, ZENRG CEO. "We are honored to enter into this alliance with TDW, the industry leader in pipeline services. Together, we will deliver comprehensive solutions tailored to each project's specific requirements while maintaining our shared commitment to excellence in every engagement."

Jeff Wilson, Vice President of Corporate Development at TDW, added, "Partnering with ZENRG expands our ability to help operators deliver on emission reductions goals while maintaining safe operations. ZENRG's approach aligns well with our standards for planning and execution, and we value their presence in key operating regions of growth."

This collaboration enables customers to conduct pipeline maintenance and repairs with enhanced safety margins while supporting environmental sustainability by eliminating the need to flare or vent methane to the atmosphere.

### **About ZENRG Services**

ZENRG is disrupting the traditional, historically acceptable methods of venting and flaring

used across the entire value chain of the oil and gas industry to retain gas and liquid hydrocarbons. A new era of emission standards, social expectations, and investor mandates are driving growth in operations at ZENRG as customers seek solutions to reduce emissions in a safer more environmentally friendly manner. Through patented processes, ZENRG transfers gas and liquids to nearby vessels and pipelines, retaining the product's value instead of releasing it to the atmosphere and reducing emissions. In many cases, ZENRG provides an economically positive ROI while helping customers to achieve their corporate emissions reduction goals.
